Summary

I am a Cloud & Infrastructure Engineer with a background in software development, focused on building scalable and automation-driven solutions on Google Cloud Platform (GCP). I actively work on cloud architecture, infrastructure automation using Terraform, and improving CI/CD processes.

Before transitioning into cloud, I built a strong foundation in software development. I developed multiple full-stack projects using technologies such as PHP, Laravel, and Vue.js, and worked with databases like MySQL.

Education

Kütahya Dumlupınar University
Computer Engineering

Graduated • 3.10 GPA
Kütahya • 2019-2023

Experience

P3

Germany

Cloud & Infrastructure Engineer

Aug 2025- Present
